GitHub: github.com/Mitchii98

PROFESSIONAL SUMMARY

Detail-oriented Engineering and Automation professional with experience in finite element analysis (FEA), simulation workflows, and Excel VBA automation. Skilled in improving engineering efficiency through digital tools, data organization, and process optimization.

CORE SKILLS

FEA (ABAQUS, HyperMesh), Excel VBA, Automation, Web Development (HTML/CSS/JS), Data Processing, Workflow Optimization

TECHNICAL TOOLS

ABAQUS, HyperMesh, Microsoft Excel VBA, GitHub, HTML, CSS, JavaScript, Canva

EXPERIENCE

FEA / Engineering Simulation Support

- Mesh generation, simulation setup, and optimization
- Improved workflow efficiency and accuracy

Excel VBA Developer

- Automated reporting and job tracking systems
- Reduced manual encoding tasks

Web Development Projects

- Built personal portfolio website
- Practicing responsive UI and animations

EDUCATION

Professional Teaching Certification (PTC)

Bicol State of Applied Science and Technology

2020

Bachelor of Science in Information Technology

Central Bicol State University of Agriculture

2015

PROJECTS

- Excel Automation System
- FEA Workflow Optimization
- Portfolio Website

SOFT SKILLS

Fast Learner, Analytical Thinking, Attention to Detail, Time Management

CAREER OBJECTIVE

To contribute to engineering and digital workflow optimization roles while improving automation and development skills.
